We wish you a pleasant stay in the HOSSZU chalets

***

CHALET B

If you have any questions or you're missing something in the chalet,
please call or text +33 6 61 98 38 79.

THE ESSENTIALS

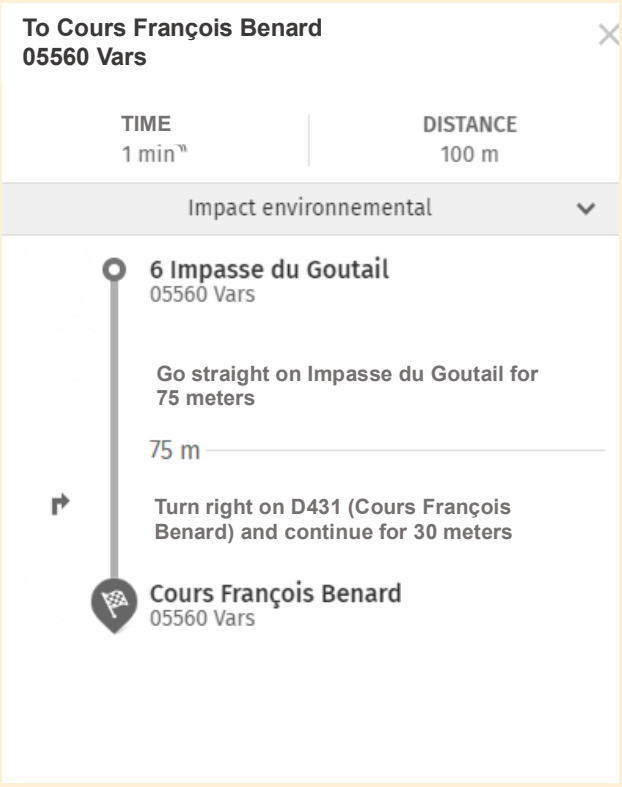
Parking: You have three parking spaces. Two cars can park side by side in front of the front door. One car can be parked behind the chalet. Other parking spaces are available in the village at 100m.

Keys: You have two sets of keys for the chalet.

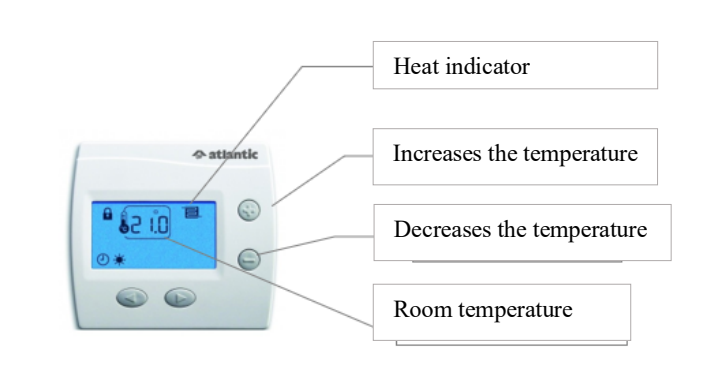
Wifi code: The network is called "Chalet B" and the password is 12345678.

Rubbish: There are rubbish collection points at the beginning of the driveway leading to the chalet. You will need to bring bags of 30L maximum to be able to deposit them in the collection containers provided by the town. For yellow rubbish (plastic, cardboard, metal) and green rubbish (glass), access is self-service. For black rubbish (household waste), you must use the card, which is in the chalet, as shown in the picture below: **Card access is temporarily suspended. You can dispose of your household waste in the container without using the card.**

Here is the map to get there:



Heating: **From October to April**, the underfloor heating provides a gentle and even heat. There is a white control box in each room to regulate the heating. The temperature indicated on the box is the temperature in the room. If you want to increase or decrease the temperature, use the + and - buttons as shown in the picture below.



The underfloor heating is off during the summer season.

There are also towel heaters in each room.

You can use the wood-burning stove. Be sure to turn off the underfloor heat in the same room in the morning, otherwise it will be too hot in the chalet. We supply the wood which is stored in front of the chalet.

SAFETY

Water: In case of emergency, call us at +33 6 61 98 38 79 because you can't turn off the water in the chalet by yourself.

Electricity: You will find the circuit breaker in the technical room.

Fire extinguishers: You will find at least one on each floor of the chalet. They are checked every year by the ADI company.

WELLNESS

The hot tub: Before each use, remove the cover and put it against the wall. **Put it back on when you have finished using it,** to maintain the temperature. Please do not put any products in the hot tub. We will come during the week to clean and treat it. If you have any doubts about the water quality, please call us and we will come and check. You may need to top up the water if the water level drops 10 cm. In the technical room next to the home theater, you have a yellow hose, roll it out to the hot tub to top up the water.

If the hot tub doesn't heat up, there is not enough water.
You need to put more water in.

You can press all the buttons on the right of the screen. To use the Jacuzzi, press the Jet (for the water jets) and Aux (for the blower that makes air bubbles) buttons. The Light button will turn on the LED strip lights. The jets stop automatically after 15 to 20 minutes. You can restart them by pressing Jets.

You can also connect your phone to the jacuzzi's wifi network to listen to music. The network name and password are displayed directly on the hot tub.

Please DO NOT ENTER the menus as this may cause the settings to be overridden for your own wellbeing and water quality.

Some safety instructions for the hot tub:

Children are not allowed in the hot tub.

Do not eat or drink in the area. At all times, you must enter and leave the facilities calmly. Do not jump into the hot tub as this may cause injury. You should use the hot tub for a reasonable period of time. Long exposure to high temperatures affects body temperature, which can cause dizziness, nausea, drowsiness, fainting, and unconsciousness, making it difficult or impossible for you to get out of the hot tub and putting you at risk of drowning.
People who are overweight, have heart problems, low or high blood pressure, diabetes, or blood circulation problems should consult a physician before using this equipment. People with injuries or infections should not use the hot tub. The hot water can encourage the growth of bacteria. The use of drugs, alcohol or medication before or after using the hot tub may cause you to faint, putting you at risk of drowning.

OTHER INFORMATION

The home theater: You have two remotes, one for the projector and one for the DVD player. Turn on both devices with these remotes. Please store the DVDs properly.

The ping-pong table: You have paddles and balls available in the chalet. If they're calling for rain, please fold up the table. In winter when there is too much snow, it is not possible to unfold the table.

The washing machine: The machine washes and dries your clothes.
